

Be Efficient!

Focus on your core business while Novius Focus' on Ours!

The Value is simple: Allow us to help you reduce your telecommunication expenses **20-50%** or more and reduce or eliminate the time employees spend on managing non-revenue generating activities.

Novius understands the complexity of the telecommunications industry and the need to proactively manage and validate all components of your telecommunication services. The **Inventory & Assessment** model is a very effective way to gain control of your current telecommunication voice and data services and see what you are actually paying for. It will also help you make decisions that will bring significant savings to your organization. Novius uses our own proprietary TEM software, **TelecomManager**, to help inventory all areas of your carrier services and give you an assessment of our findings that will deliver greater results to your organization.

Each and every time we partner with our clients we uncover areas that impact their bottom line, bringing them savings they had been missing. From CEO's to CFO's to IT departments, we work with all areas to deliver a successful project, giving organizations a better understanding of their voice and data carrier services.

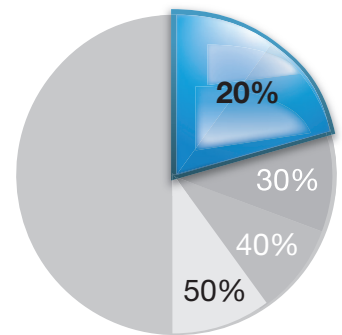

Leading Telecom Research Firm states:

“Organizations can routinely save more than 10 percent of their annual telecommunication expenses by systematically checking their carrier bills against equipment and services in use.”

—Gartner Research

Novius typically saves their clients between 20 and 50%

A **Three** Phase Approach

Inventory & Assessment – Provide clients with a detailed Service Inventory Report based on your carrier's invoices, records, charges and contracts; as well as deliver a full assessment highlighting areas of improvement and opportunities to optimize your organization's telecom services.

Implementation of Savings – On client's behalf, the recommendations that have been approved by your organization will be processed and validated on future invoices for accuracy.

Track Changes & Monthly Invoice Validation – We will be reviewing invoices on a monthly basis to ensure the changes that we implemented are processed correctly by the carriers and we will validate the invoices future accuracy and carrier agreement expiration dates.

Total Repair Express

“Novius has done a tremendous job with the cost savings for our company. Through your efforts we have realized a 40% reduction in our telecommunication expenses resulting in a significant savings on an annual basis. I would recommend your organization to assist other companies realize their savings.”

—Christian Mills, CEO & President
