

Work Smart!

Work smarter not harder with our **TelecomManager** app.

TelecomManager, a totally unique web-based telecom solution designed to help organize and manage your voice and data services, tickets, proposals. Easy to use and accessible anywhere on the web.

TelecomManager is truly bringing great value to our clients! This Software as a Service (SaaS) organizes your telecommunication services, carrier agreements and much more for your organization. These features are designed to bring all the key elements of telecom management to your finger tips. For those organizations that require support, **TelecomManager** gives you your very own customized ticket system for your moves, add, changes and disconnects (MACD).

Managing internal telecommunication voice and data services can be time consuming and difficult for any organization without the proper tools, not to mention trying to manage locations that span across the country. Reconciling and paying telecommunication invoices without knowing if your invoices are correct can be equally challenging when you are not sure what you are looking at. **TelecomManager** gives you the visibility into the key areas that are important to managing your telecommunications..

TelecomManager benefits your organization:

- **Client Dashboard**
View key information quickly on your Dashboard
- **Monthly Invoice Validation**
Validation of your voice and data service invoices to ensure we identify anomalies in invoicing and highlight opportunities for cost savings
- **Inventory Management**
Management of your carrier services, accounts, charges, Circuit ID's, IP Addresses & agreements by location to ensure accuracy across all cost centers
- **Cost Reduction & Proposal Approval**
Controlling/reducing cost with a Proposal section allowing you to review and approve items that are proposed
- **Carrier Management & Support Ticket System**
Expertise in carrier interaction and MACD processing with our ticket system customized specific to your accounts
- **Carrier Negotiation & Procurement**
Direct negotiation with a wide variety of data and voice service providers
- **Agreement Expiration Alerts**
Carrier contract alerts reminding you when contracts are coming due 90, 60 & 30 days before expiration
- **Reporting of Expenses or Trends**
Views of your carrier information with graphs that help you see monthly, quarterly and annual spending and usage trends
